What is MIDAS Ireland?

MIDAS Ireland (Microelectronic Industry Design Association) is a joint industry and academic organisation which defines and develops the future direction of Integrated Circuit design in Ireland. It is a national cluster consisting of the microelectronics design companies and third level institutions in Ireland, building on the already-strong relationships between them.

Main MIDAS Activities

- Dialogue on research to Promote industry/academic collaboration
- Sponsorship of conferences and student prizes
- Promote Electronic Engineering as a career including outreach
- Co-ordinate training courses for members and fund new, relevant courses
- Foster the ecosystem for indigenous IC Design startups and established companies
- Collaborate with and advise relevant agencies
