WELCOME TO THE NMI MEMBER PRODUCT CATALOGUE

The NMI Member Product Catalogue is an opportunity for our members to promote their products and services to the TechWorks communities. This catalogue will be distributed to a range of experts within industry including: Automotive Electronics Sector, Manufacturing, Suppliers, Electronics Design, Power Electronics and more. NMI will release a Members Product Catalogue on a quarterly basis in order to highlight our members new products and services throughout the year.

Don't forget to click on the product listings for more information.

If you would like your organisations new products or services to feature next time, please email ronan.moore@techworks.org.uk for more information.

**Champion for the UK Electronics Manufacturing
and Electronic Systems Industries**

Social distance in the workplace with eqWave

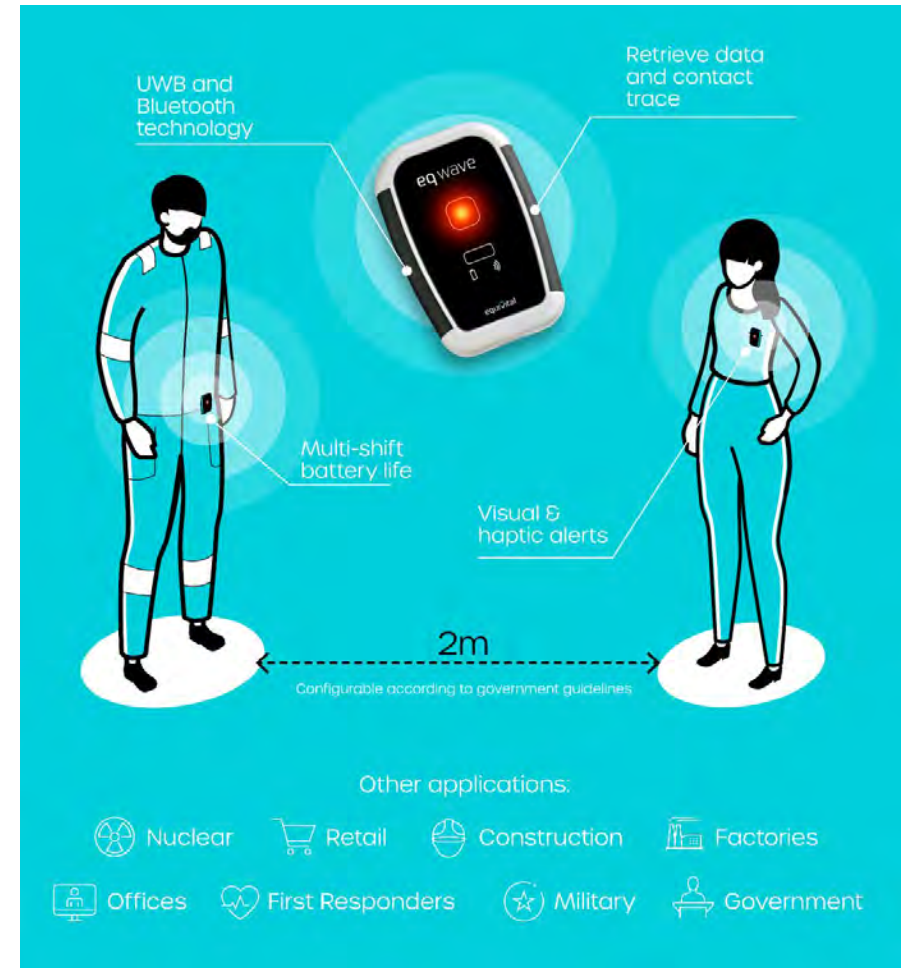

Affordable, easy-to-deploy wearable technology that helps to keep workers safe by enforcing social distancing with contact tracing capabilities.

Equivital's eqWave enables your workforce to adhere to social distancing guidelines and continue to do their jobs effectively with peace of mind.

Additional contact tracing capabilities gives you the data you need to control the spread of the virus should an employee become infected.

The eqWave device must be worn by all staff and will alert if they get within a pre-specified distance that can be configured to current government guidelines.

Accurate distance measurements are made using Ultra Wide Band (UWB) giving centimeter levels of precision. Unlike other systems that are based on Bluetooth alone, the eqWave gives 360 degree coverage.

Inspire your workers and show you've got their best interests at heart. Contact us now to arrange a demo on 01954 233 430, email info@equivital.com or visit: www.equivital.com

Jaltek Systems

Jaltek is a leading AS9100 and ISO 13485 accredited UK based contract electronics manufacturer with over 30 years' experience. We offer a comprehensive range of integrated design and manufacturing services adapted to meet our customer's varied requirements.

Focusing on low to medium volume, high mix product profiles for a range of industries, Jaltek uses advanced systems to support products throughout their lifecycle, offering a single service or complete solution.

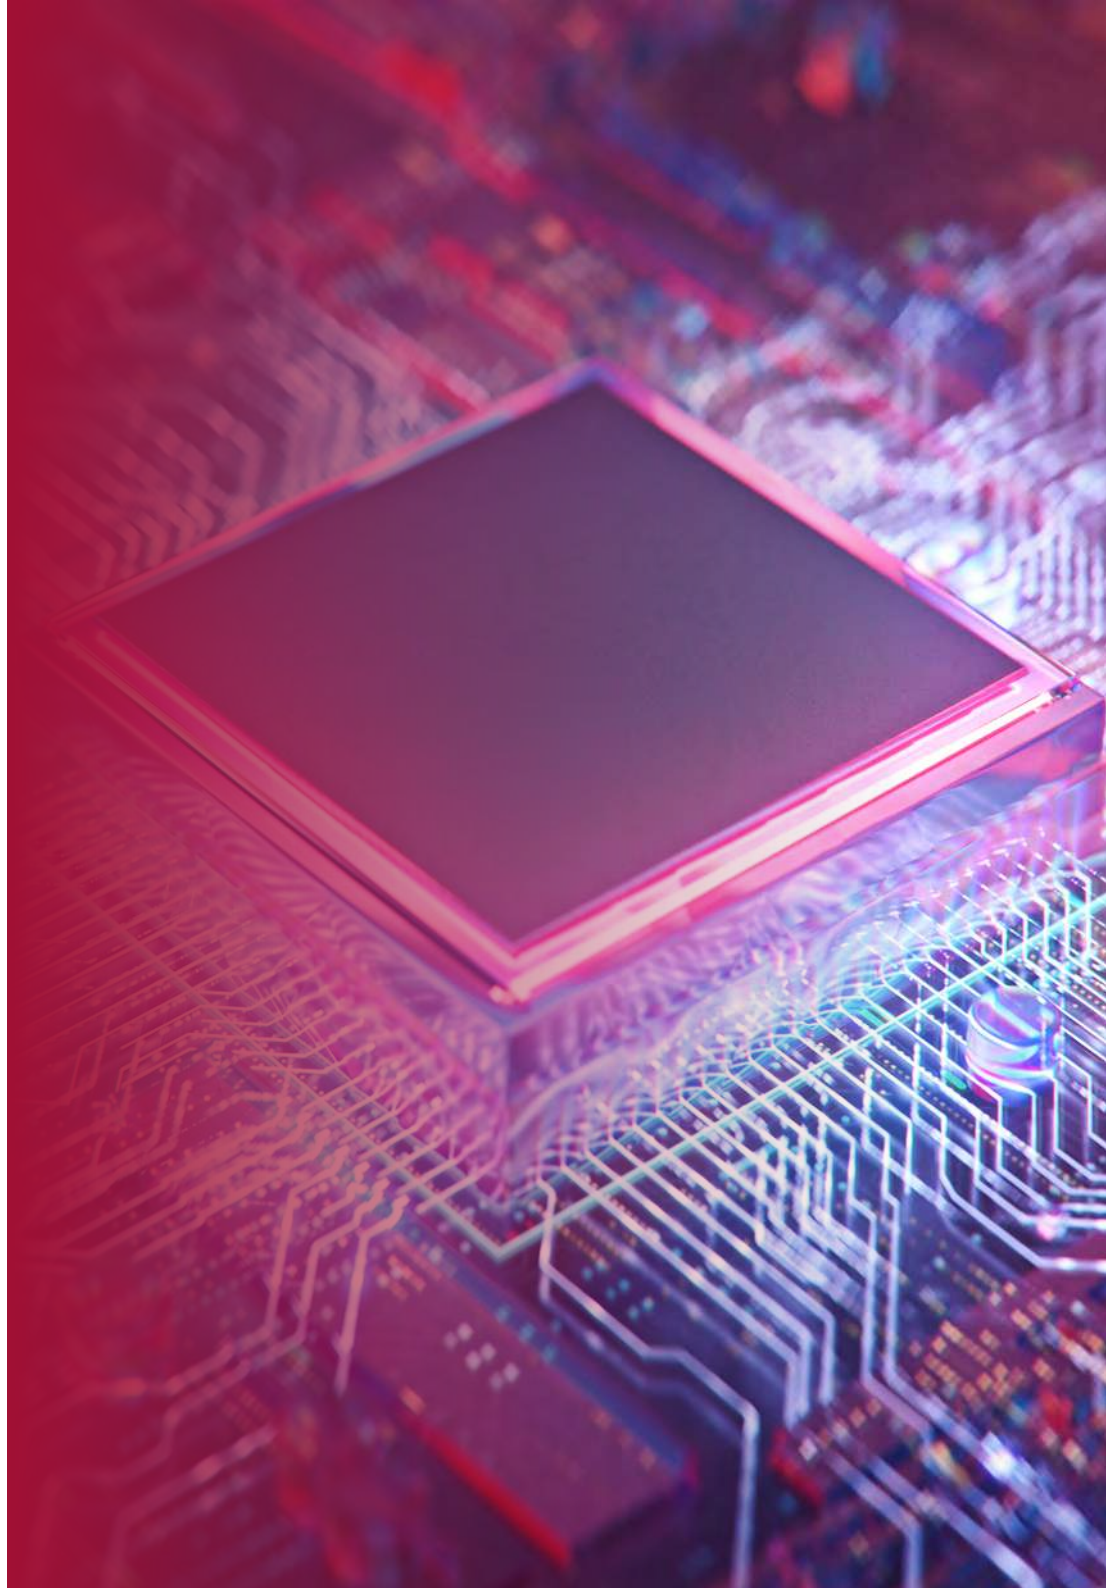

Jaltek's technology line-up includes surface mount equipment for volume production and a dedicated new product introduction line, all supplied by Blakell Europlacer.

lineo+ is a multifunction SMT pick and place platform designed to provide the highest level of flexibility. Furthermore the 'prototyping' line and the main production lines are completely compatible allowing prototypes to seamlessly transfer to the main production lines.

Understanding that time to market is vital, Jaltek's unrivalled fast paced prototype service ensures market opportunity is never lost.

If you would like to hear about our services and how we might be able to help you, please contact us on +44 (0) 1582 578170 or at info@jaltek.com.

PMT (GB) Ltd is an ISO 9001:2015 quality led company, we have been in business for over 20 years covering the UK and Ireland. We are dedicated to the provision and service of Particle Counters both Aerosol, Chemical and Liquid, Facility Monitoring Systems, CPC's and Ionisation equipment.

Our core areas of expertise are primarily focussed on the following industry sectors but not limited to these:

Pharmaceutical | Food, Cosmetics, Beverage | Semiconductor | Chemical | Automotive | Aerospace | Electronics | Research | Life Science | Medical Devices | Biomedical

We have developed diverse solutions in various applications in particle counting technology, microbial contamination control and Electrostatic static Elimination & Control.

Accredited Calibration and Service

PMT (GB) Ltd is a UKAS (ISO17025) Accredited Calibration Laboratory (0829) for Particle Counter Calibration and Air Sampler calibration. Clients who use PMT (GB) Limited can now have an even greater confidence in the competence and quality of the service provided.

0829

Surface Particle Counting

The PartSens+ 4.0 device is a portable measuring system with a wireless measuring head for direct measurement of metallic and non-metallic particles, fibres, dust and other impurities on surfaces. Mobile design and easy operation makes this instrument the perfect solution for companies that want to verify the cleanliness of surfaces. The use of glancing light technology according to ISO 14664-9 allows for reproducible and highly accurate measurement results.

PartSens+ 4.0 determines particle size and the number of particles directly. The measurement result – including the live image – is immediately displayed on the instrument via wireless transmission.

Aerosol Particle counters

From 0.1µm to 25.0µm we are able to cover any contamination monitoring required for the semiconductor, electronics and even automobile industries. These can be used as stand-alone or connected to a facility monitoring system covering your complete production facility.

CLICK HERE!**

- 12 Month Warranty
- Free Evaluation
- No Fault/ No Charge
- 2-3 Day Repair Turnaround
- Genuine OEM Components
- Reliability Upgrades Offered
- Flexible Pricing (Open PO Options)
- Highly Detailed Service Reports
- Over 1000 Sales Unit Inventory
- Videos Of Units On Final Test
- Buy Back On Redundant Equipment
- 24/7 Online Customer Portal
- AEO Accredited Company

Low cost repairs, refurbs & sale of RF Generators & RF Matching Units

SiSTEM Technology

SiSTEM Technology is a full-service company founded in June 2004. We offer a wide range of leading edge process tools and ancillaries, automation and consumables to the microelectronics and other high technology industries, throughout Europe.

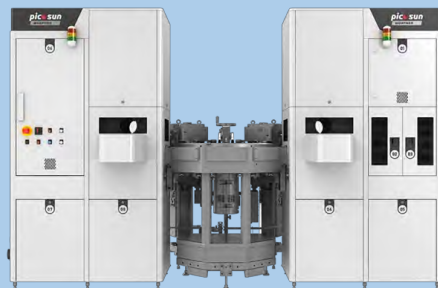

Process with confidence.

Consistent, reliable results the first
time, every time

Temporary Bond/De-bond Systems,
Bench Top Spin Coat, Bake , Develop
& Clean.

Picosun brought a number of significant new products to the semiconductor market. PICOSUN® Sprinter, a high throughput ALD production module for 300 mm wafers. PICOSUN® Morpher product family, grew with Morpher P (PE-ALD).

Europe's leading supplier of 200MM SMIF load ports to the widest range of process tools. Sorters, EFEMs, Mass Transfer Systems, High Volume Cure Ovens, Stockers, Laser Marking and Automated Material Handling Systems for 300mm

Photolithography wet process tools. Semi-automated and fully automated spin/spray coating, developing, baking or smart EBR. Also wet cleaning, post CMP clean, etching and metal liftoff. Substrates up to 21" x 21"

For further information on SiSTEM Technology, our products and services please visit our website www.sistemtechnology.com

Contact us: sales@sistemtechnology.com or call 01327 317621.

Latest NMI Members

We'd like to extend a warm welcome to the latest members of the NMI Community: Class One Technology, Deposition Technology Ltd, JT Support Ltd, Keysight Technologies UK Limited and Semiconductor Technology Ltd. If you would like any help in connecting with our new members or any members within NMI, please reach out and we will be more than happy to make introductions.
