**MEMBER PRODUCT
CATALOGUE**

WELCOME TO THE NMI MEMBER PRODUCT CATALOGUE

The NMI Member Product Catalogue is an opportunity for our members to promote their products and services to the TechWorks communities. This catalogue will be distributed to a range of experts within industry including: Automotive Electronics Sector, Manufacturing, Suppliers, Electronic Design, Power Electronics and more. NMI will release a Members Product Catalogue on a quarterly basis in order to highlight our members new products and services throughout the year.

Don't forget to click on the product listings for more information.

If you would like your organisation's new product or services to feature next time, please email info@techworks.org.uk for more information.

Champion for the UK Electronics Manufacturing
and Electronic Systems Industries

We offer a wide range of leading edge process tools and ancillaries, automation and consumables to the microelectronics and other high technology industries, throughout Europe.

sales@sistemtechnology.com

+44 (0) 1327 317 621

Europe's leading supplier of 200MM SMIF load ports for the widest range of process tools. Sorters, EFEMs, Mass Transfer Systems, High Volume Cure Ovens, Stockers, Laser Marking and Automated Material Handling Systems for 300mm.

Photolithography wet process tools. Semi-automated and fully automated spin/spray coating, developing, baking or smart EBR. Also wet cleaning, post CMP clean, etching and metal liftoff. Substrates up to 21" x 21".

Bench Top Spin Coat, Bake, Develop & Clean. Process with confidence. Consistent, reliable results the first time, every time. Temporary Bond/De-bond Systems. X-Pro II Workstation.

Picosun's significant new products include the Picosun Sprinter, a high throughput 300mm ALD production module and the Picosun Morpher for 200mm batch production. Also thermal and plasma enhanced ALD systems for R&D and pilot production.

Design the Future of Automotive

In the age of software-defined vehicles, Synopsys powers innovation from System to Software and Silicon to drive safety, security, reliability, and quality in the new automotive digital value chain.

Power Your Automotive Innovation
with Synopsys

Powering the Era of Smart Everything From Silicon to Software

From the chip to the cloud, Synopsys technology is at the heart of innovations that are changing the way people work and play. We help you meet new requirements for power, reliability, mobility, and security that are the foundation for Smart Everything. Usher in a new era of chips and software—and bring Smart Everything to life—with Synopsys.

High Voltage, Pulsed Power & Power Electronics

PPM Power has been a leading specialist distributor of components and systems for high voltage, pulsed power and power electronics, in the UK, since 1994.

Products include power supplies, semiconductors, HV switches, capacitors and resistors, as well as programmable power supplies and cooling solutions to support applications including electric vehicles, subsea and analytical measuring devices. Many products are available as bespoke solutions - contact us to discuss your requirements.

Power Supplies for Net Zero

Genesys+ Scalable Power

High power programmable DC power supplies offering 10 kW in a 2U high package and 15 kW in a 3U.

AC Grid Simulators

AC power sources up to 4 MVA, for high-performance and multi-functional grid simulation.

Automotive Test Systems

Test bench energy systems up to 750 kW for R&D, quality assurance and EOL testing.

RF Plasma Generation

RF Plasma Generators
Automatic Impedance Matching Units
RF Coaxial Switch Boxes
Coaxial Cabling
Measuring Devices
Technical Support

Customized to your process

Semiconductor, Flat Panel, MEMS, Solar

DC Power Supplies

Recently Launched

DC Power Supplies for
Sputtering Deposition

Semiconductor, Industrial
Coatings

Cold Plasma Technology

Patented microwave plasma technology
Non-thermal atmospheric pressure
Anti-bacterial efficacy
Surface Energy Modification
Etching & Deposition at higher powers

Dielectric Barrier Discharge Air Plasma
Surface cleaning and modification
No external gas supply
Scalable and flexible technology

Contamination Control for the Semiconductor Industry

**PARTICLE
MEASURING
SYSTEMS®**
a spectris company

Providing particle monitoring instruments with industry leading sensitivity for Chemicals, DI Water, and Airborne Applications.

Scanning Probe Microscopy Services

Capability

- Field of View: $8 \times 8 \mu\text{m} \rightarrow 0.5 \times 0.5 \mu\text{m}$ @ 1Mpx, configurable
- Resolution: horizontal $< 1\text{nm}$, vertical $< 0.1\text{nm}$
- Imaging Speed: 4sec to 16min @ up to 0.2Mpx/s
- Automated instrument & stage operation
- Comprehensive data analysis solutions
- Processing of large data sets
- Sample confidentiality
- In-person & remote scanning

Probe Techniques

- High speed surface metrology: dynamic mode
- High aspect ratio 3D surface profiling: adaptive mode
- Surface modification / layer removal for 3D tomography
- Conductivity C-AFM, surface roughness

Working with Customers to create history

Jaltek Systems is a leading AS9100 and ISO 13485 accredited UK contract electronics manufacturer with over 30 years' experience. We offer a comprehensive range of integrated design and manufacturing services adapted to meet our customer's varied requirements.

Focusing on low to medium volume, high mix product profiles for a range of industries, Jaltek uses advanced systems to support products throughout their lifecycle, offering a single service or complete solution.

We have a diverse customer base, from global PLCs to start-up ventures, many have worked with us for over 15 years - testament to our customer focus and support in an ever changing marketplace.

- 3 SMT Lines
- Dedicated NPI Line
- PCB Layout
- Selective Solder & Manual Assembly
- IPC-A-610 Class 3 workmanship standard
- Cable Assembly
- Conformal Coating
- Pressfit
- Extensive test suite
- X-ray
- State-of-the-art 3D inspection
- Box-build & High Level Assembly
- System Integration
