**MEMBER PRODUCT
CATALOGUE**

WELCOME TO THE NMI MEMBER PRODUCT CATALOGUE

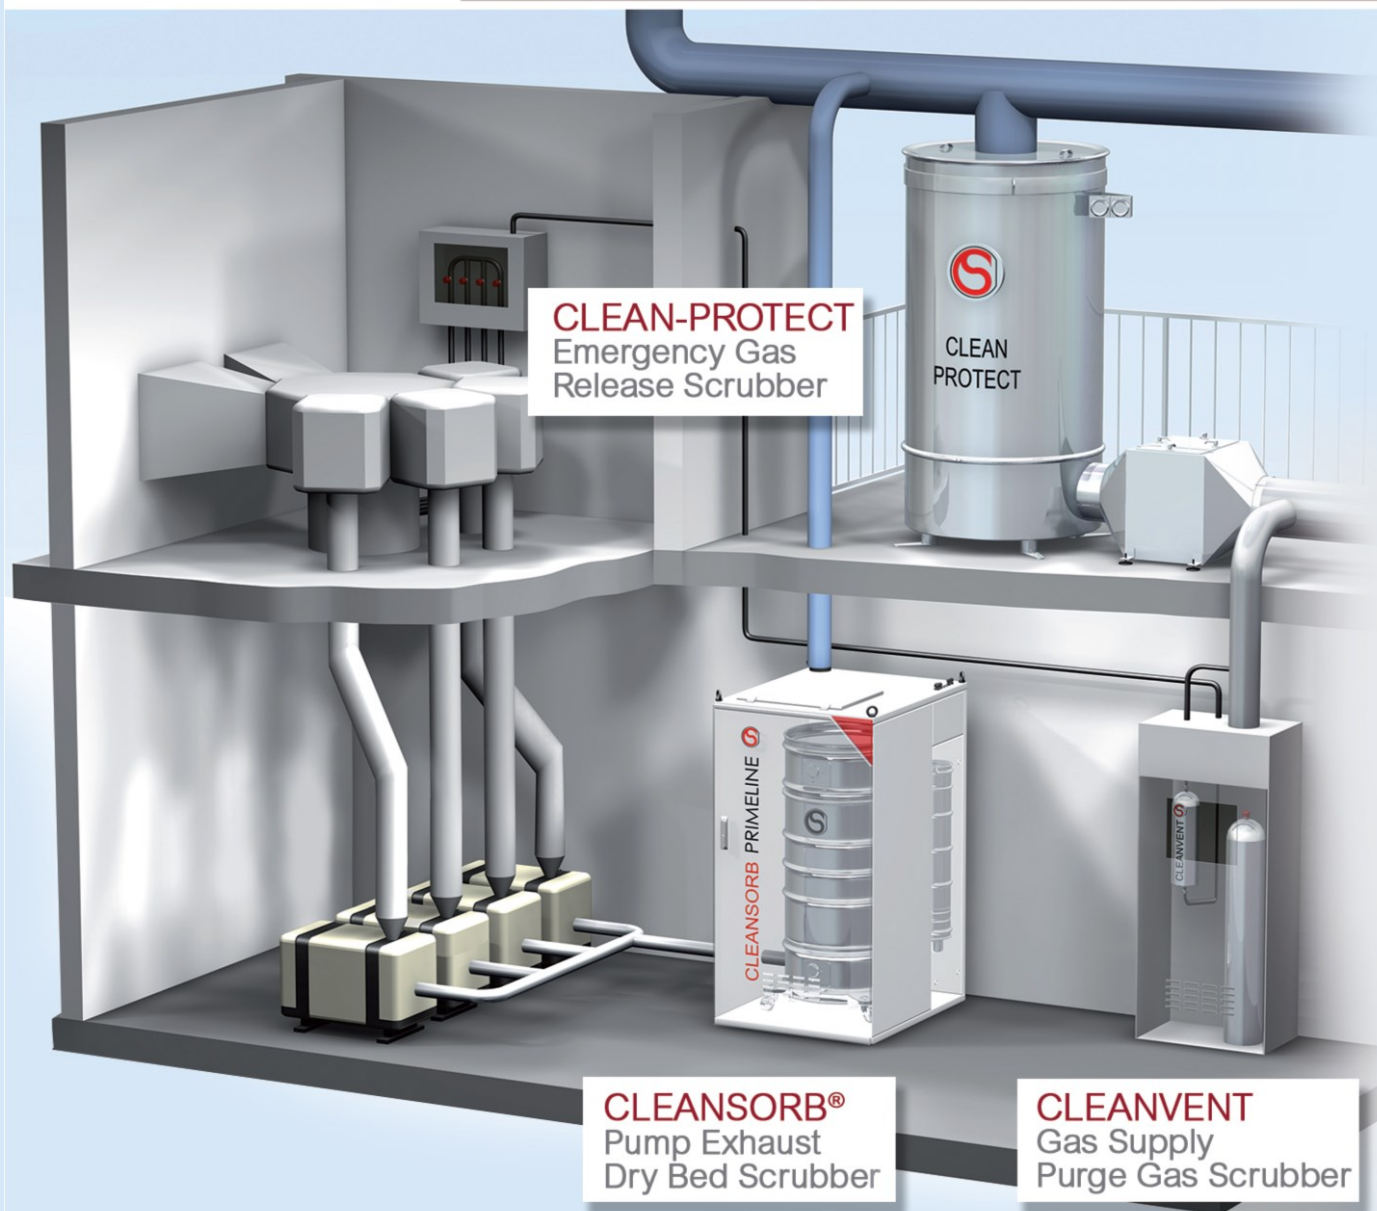

The NMI Member Product Catalogue is an opportunity for our members to promote their products and services to the TechWorks communities. This catalogue will be distributed to a range of experts within industry including: Automotive Electronics Sector, Manufacturing, Suppliers, Electronic Design, Power Electronics and more. NMI will release a Members Product Catalogue on a quarterly basis in order to highlight our members new products and services throughout the year.

Don't forget to click on the product listings for more information.

If you would like your organisation's new product or services to feature next time, please email info@techworks.org.uk for more information.

**Champion for the UK Electronics Manufacturing
and Electronic Systems Industries**

CLEAN-PROTECT
Emergency Gas
Release Scrubber

CLEANSORB®
Pump Exhaust
Dry Bed Scrubber

CLEANVENT
Gas Supply
Purge Gas Scrubber

Toxic Gas Abatement

Safe and eco friendly solutions
where you need them

- ▶ Safe, dry chemical conversion of toxic gases to stable solids
- ▶ Proprietary CLEANSORB® media
- ▶ No handling of toxic waste
- ▶ Practically maintenance free
- ▶ Local refill service worldwide

Website: www.csclean.com

Toxic & Flammable Gas Detection

From  NEW COSMOS - BIE

- ▶ Fixed, and portable detectors
- ▶ Toxic, flammable, pyrophoric gases
- ▶ Installation, commissioning, calibration

EMS Particle Solutions **exclusively**

supply Particle Measuring Systems products

in the UK & Ireland

HORIBA's expert analytical solutions applicable to **compound semiconductor**, **photovoltaic** and **photonic** applications are **much more** than just **fluid control**.

With **decades of experience** in **spectroscopy techniques**, **HORIBA** supports fabrication process by providing **critical data** that helps guarantee **process efficiency**.

HORIBA

Explore the future

01604 542 500

enquiries.uk@horiba.com

www.horiba.com

Learn how **HORIBA** have combined our experience of **semiconductor processing** and expertise in **optical instrumentation** to produce a range of **endpoint detection devices** that ensure repeatable control of dry (plasma) etch processes **enabling high yield every time**.

Contact us today to **discuss** your current and future **measurement challenges**.

Download your **free copy** of our new **e-book** that demonstrates how **HORIBA** is enabling **QC managers** and **device developers** to enhance yield and improve device performance using **photoluminescence** of both full wafers and single dies **on the same tool**.

Contact us today to **discuss** your current and future **measurement challenges**.

ilika | stereax[®]

Stereax micro solid state batteries

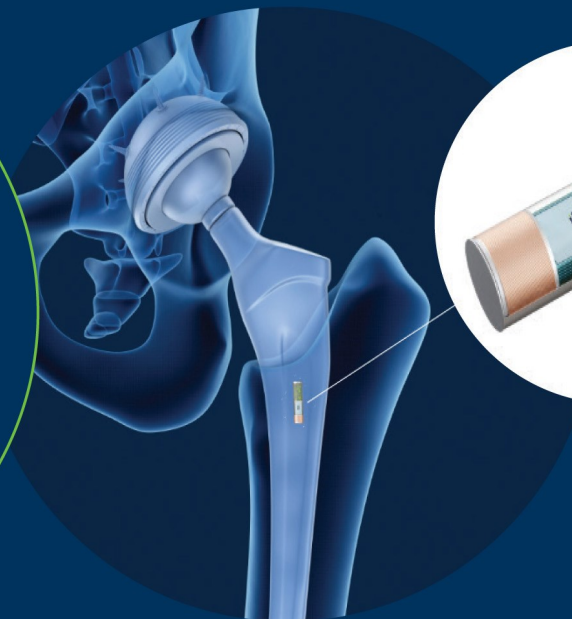

Designed for next-generation medical implants and Industrial IoT sensors

Ilika opens
the UK's
first facility to
manufacture solid
state batteries

Stereax M300:

- Ultra thin form factor of 1.0 mm
- Miniature footprint 3.6 mm x 5.6 mm
- Stackable for increased density
 - High capacity 300 μ Ah
- Fully solid state so no leakage of toxic liquid
 - Fast charge
 - High cycle count

Contact info@ilika.com for more information

Metron^{3D} High Throughput Metrology

Metron^{3D} is a HVM ready metrology system for high speed measurement of challenging nanoscale structures that are critical to modern semiconductor manufacturing.

Metron^{3D} combines the well-established benefits of Atomic Force Microscopy (AFM) with fundamentally new inventions that **increase throughput by at least 100 times** and **probe lifetime by 10 times**.

Metron^{3D}'s innovative technology allows all of the technical benefits of Probe Metrology to be used for in-line / HVM metrology at throughputs sufficient to address multiple applications with dense sampling and on a reliable, production - ready platform.

- Metron^{3D} is well suited to EUV Litho characterization, Post Etch profile and CMP evaluation tasks.
- Metron^{3D} is free from process sensitivity, resist charging and other effects that cause drift and offsets.
- Measurements can be hyper local, large area or anything in between.

Bespoke Case Making & Export Packing

We are experts at designing & building bespoke timber cases to securely pack your equipment.

Our cases are ISPM 15 accredited, ready for export and our floating bases protect your sensitive equipment during transit.

Sustainable Timber

We are in the process of establishing our own sawmill with the support of Scottish Forestry.

The sawmill will enable us to source our timber from Scotland and by doing so reduce our emissions and increase the sustainability of our case making & packing services.

Moving Solutions

Our trained and certified operatives work safely and efficiently to deliver expert rigging solutions

We can safely move your machinery using a wide range of specialist equipment and expertise including contract lifts & air flotation.

PTW Europa

Your Partner for Legacy Tool Support

PTW Europe presents: **ROBOT MEASUREMENT CASSETTE (RMC)**

The RMC is designed to provide quantifiable data from the measurement of the movement of the robot blade with respect to the wafer. With state-of-the-art sensing methods, it captures the fine measurement, where the naked eye fails to see.

The data can be used to support robot teaching and create analysis of:

- Robot setup – To replace individual perceptions based on eye sights
- Tracking of robot drift to set overhaul intervals
- Incident based collaboration – Work together based on measured data to solve the problem and avoid finger pointing
- Sharing of best practice and best setup values based on each machine and product type

PRODUCTS

STREM
CHEMICALS UK LTD

ALL THE ELEMENTS OF EXCELLENT
CUSTOMER SERVICE

Strem manufactures and markets a wide range of metals for R&D in the pharmaceutical, microelectronics, chemical and petrochemical industries as well as academic and government institutions.

Nanomaterials • Electronic Grade Chemicals • Ionic Liquids
MOCVD,CVD,ALD Precursors • Metals • Inorganics • Organometallics
Catalyst • Biocatalysts • Ligands Custom Synthesis • cGMP

**THERMCO
SYSTEMS**

Intelligent Furnace Solutions

DIFFUSION & LPCVD FURNACES

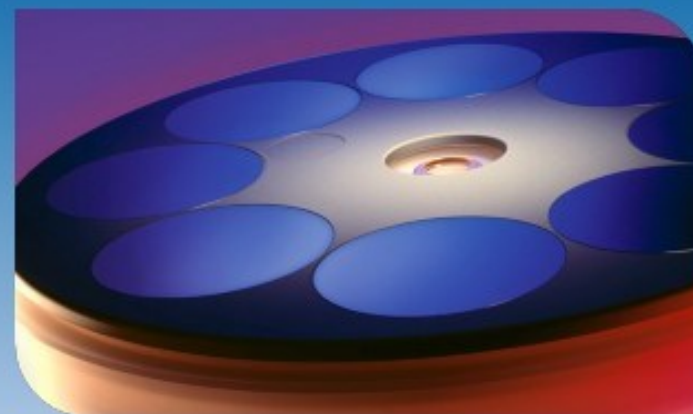

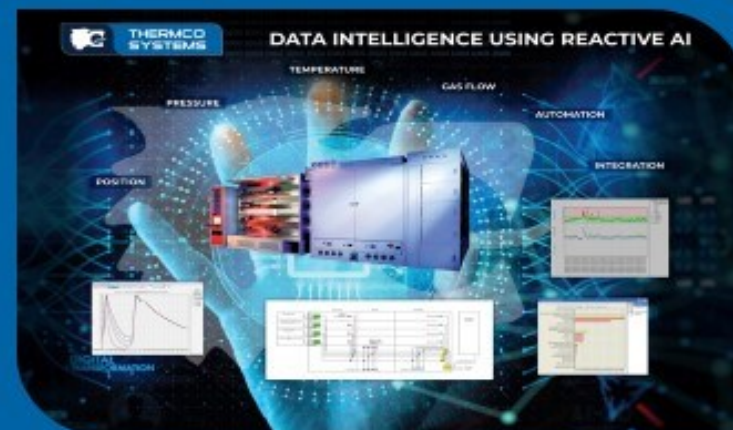

- Fully automated cassette-to-cassette solutions
- State-of-the-art computer control system
- Data collection and SPC analysis using reactive AI
- Multiple applications including Semiconductor, MEMS, PV, and LED
- Largest installed base worldwide with lowest CoO and high MTBF
- System design based on 45 years experience
- Comprehensive product range from R&D systems to production tools
- Extensive global support network

CHEMICAL WET BENCHES

- Fully automated, semi-auto and manual wet stations
- For semiconductor, industrial and medical applications
- Electroless metal deposition – Au, Ni, Pd, Cu, Ag
- Porous Si Etching systems
- Single wafer cleaning and metal lift off tool
- Custom wet chemical solutions for demanding applications
- Chemical delivery and distribution system design and manufacture
- Reduced Surface Tension dryer
- Chemical delivery (CDU) and control solutions
- Gas Cabinet and abatement solutions

EPITAXY REACTORS

- High Process Flexibility
- Substrate diameters from 100 to 200mm
- Wide EPI Layer thickness from $< 5 \mu\text{m}$ to $> 100 \mu\text{m}$
- EPI Layer Resistivity from $0.02 \Omega\text{cm}$ to $> 50 \Omega\text{cm}$
- Dual process chamber system with high throughput
- Low Cost of Ownership
- Sharp dopant transitions due to unique dopant injection system
- Wafers x dia: 35 x 100mm, 24 x 125mm, 18 x 150mm, 8 x 200mm
